Description:

This facility was designed with the idea of minimizing its impact on the site and the developing surrounding neighborhood. This is the largest "community" structure in the area and as a result the design reflects sensitivity to environmental and economic concerns. The design is reflective of the "mall" concept. The two 'anchor' departments to this mall are the Fine Arts and the Athletic areas. The "Food Court" or Commons is near the center of the facility. Classroom clusters lay between the Commons and the two 'anchor' departments.
