**Resilient:** Armstrong, 5,000 sq.ft

**Cove Base:** Roppe, 20,000 lineal ft.

**Other Services:** Design specification services

**Description:** This courthouse is the largest federal contract issued by the Ft. Worth Region office of the General Services Administration. The multi-story facility houses U.S. federal judges' chambers and courtrooms. White Construction sought a reputable flooring contractor that would fulfill the project requirements with no surprises. White also wanted help in selecting quality products based on their budget. Installation began in 2009 with a six-person team. "We've done dozens of projects with White Construction and it was important to them that they work with someone they could trust to meet the budget with quality work," said Bill Embrey, director of access flooring. "We also worked closely with Carter Burgess and were instrumental in helping them select products to meet their budget."
